JM Model

This compact 110V-220V Sauna heater is a space saver in a small room. Measuring only 12" wide x 9" deep x 25" high, it has the only built-in heater fence in the industry. Unlike other heaters of its size which are light weight, the Compact has heavy-duty deluxe stainless steel construction for strength and durability.

KV Topclass Model

This top-of-the-line wall mounted heater is engineered for the 21st century. The lighted control panel built on the side of the heater is designed for simplicity and ease of use and it is reversible-left or right side. With beautiful stainless steel construction and high tech design, the long lasting Topclass is the heaviest duty of any wall mounted heater in the industry.
